

WORK EXPERIENCE

Software Engineer | Motorola Solutions

March 2021 – Present

C#, Azure DevOps, Powershell, YAML, AWS services

- Developing new features for Motorola's cloud CAD software.
- Upgrading Micro Services to function with new standards.
- Product owner for OAuth and session building micro services.
- Resolved issues with and upgraded logging systems for several cloud based micro services.
- Created YAML based Azure pipelines to build and initialize updated Azure cloud storage system.

Software Engineering Intern | Cisco Systems

June 2018 – Aug. 2018

Python, JavaScript, HTML, CSS

- Re-coded old Cisco libraries to function with new standards.
- Developed an internal website tool, dubbed Yangle, to automate testing script processes.
- Presented Yangle to a board of vice presidents and project leads.
- Earned first prize and received People's Choice Award in the inaugural Cisco Intern Expo.

Systems Engineering Intern | Motorola Solutions

May 2016 – Aug. 2016

Microsoft Excel, Proprietary System Design Application

- Designed a cost-efficient communications network for the public safety sector of Montgomery County, Maryland.
- Collected and analyzed data to optimize RF tower antenna coverage and allow for future network expansions.

PERSONAL PROJECTS

Simplify

December 2021 – Present

React, Express.js, Node.js, MongoDB

- Developing a task tracking application with dashboards to improve user motivation and inspire productivity.
- Front-end developed using React, Redux, and Moment.js.
- Back-end developed using Node.js Express.js, and MongoDB.

Kiwi

August 2020 – Present

JavaScript, MongoDB, Node.js

- Developed a Node.js server app that assures users efficient resource usage via predictive statistics calculations.
- Created a robust MongoDB database backend to collect usage data to identify potential improvements.
- Application has a user base of over 200,000 with a 500% user higher retention rate than all its competitors.

Personal Website

June 2018 – Present

HTML, JavaScript, jQuery, CSS

- Developed interactive resume website with JavaScript, jQuery, HTML, and CSS.
- Designed a responsive and interactive UI for both mobile and PC.

Apollo

Nov. 2020 – Dec. 2020

Kotlin, JavaScript, Adobe Illustrator, HTML, CSS

- Designed and developed an Android app gamification of "Go-No-Go" inhibition testing.
- Built a database to store user account info, including reaction timing, success rate, and more.
- Designed and developed a landing page for the app.

University of Maryland CS Systems Bot

Oct. 2020 – Dec. 2020

JavaScript, Node.js

- Developed a Node.js server app to streamline daily operations in the Computer Science department at UMD.
- Automates basic responsibilities of student employees to facilitate more efficient processing times.
- Logs task completions and employee notifications for supervisors to view on a dashboard.
